- 1) What is the fossil?
 - a. Ammonoid
 - b. Brachiopod
 - c. Gastropod
 - d. Trilobite
- 2) This group is **extinct** and **non-marine based**.
 - a. True
 - b. False
- 3) What is its biological symmetry?
 - a. **bilateral**
 - b. **radial**
 - c. **spherical**

(Hint: In **bilateral** symmetry only one plane divides an organism into roughly mirror image halves; Organisms of **radial** symmetry resemble a pie where several cutting planes produce roughly identical pieces; **spherical** symmetry occurs in an organism if it is able to be cut into two identical halves through any cut that runs through the organism's center.)
- 4) The youngest period of Paleozoic ____ is _____.
 - a. Era
 - b. Eon
 - c. Epoch
 - d. Cambrian
 - e. Permian

- 5) **Graded bedding** consists of the finest grains at the bottom and successively coarser grains toward the top.
 - a. True
 - b. False
